Buckhorn Community Events Coming Up:

Halloween at the Park – October 29 at 11:00 a.m.
Veterans Day – U.S. Flags at Buckhorn’s entrances
Buckhorn College Scholarship Applications Available – December 1
Santa Claus Parade – December 10 at 2:00 p.m.
Santa at the Park Celebration – December 10 at 3:00 p.m.
Holiday Christmas Lights Judging – December 18 in the evening

Your Kids Get To Make A Real Scarecrow

At Buckhorn's Halloween At The Park event on October 29 at 11:00 a.m., we have arranged for each child to make their own scarecrow to take home. We are providing shirts, pants, straw, and material to make a head, and you will be able to build your scarecrow at the park. What a great Fall item for your child and you to use to decorate your home. Get ready for Thanksgiving!
HALLOWEEN AT THE PARK

October 29 at 11:00 a.m.:

➢ For kids up to 10 years old
➢ Haunted egg hunt – 1,000 orange and black plastic eggs with toys inside.
➢ Make a real scarecrow for your home.
➢ Games
➢ Refreshments

SANTA CLAUS PARADE & SANTA AT THE PARK

➢ December 10:
  ▪ 2:00 p.m. – Santa and Mrs. Claus will drive throughout Buckhorn in a parade of Sheriff’s cars, a fire truck, and other vehicles. It will end up at Buckhorn County Park. Candy will be thrown to your kids.
  ▪ 3:00 p.m. – Santa-at-the-Park event. Santa and Mrs. Claus will be sitting in their thrones to have their photos taken by you. Each child will be given a gift for allowing you to take their picture. Refreshments will be served.
Judging will be December 18 in the evening

A committee of Buckhorn residents will tour Buckhorn in the evening to select the best lighted homes. There will be numerous cash awards given to the best lighted homes. LIGHT UP YOUR HOME TO CELEBRATE Christmas and the holiday season.

AREA TRAFFIC CHANGES ARE COMING

CREST POINTE TOWNE SHOPPES

These stores are anchored by the new Wal-Mart on Bloomingdale. Several of the out parcels are currently in varying stages of construction. They are trying to open for the holiday season. Wendy’s, Chick-fil-A, Starbucks, Tijuana Flats and Mattress Firm will soon be adding scores of vehicles to the traffic on Bloomingdale and Lithia-Pinecrest. You may have noticed that none of these retailers have direct access to Bloomingdale which is a safety benefit for drivers. The traffic will enter and exit these businesses by the service road immediately behind these stores.

Redstone, the developer, has already received numerous complaints about their original design of the single traffic lane leaving the property at the traffic signal on Bloomingdale. One vehicle waiting for the signal to turn green and wanting to turn left can currently block all the traffic leaving the property until the signal goes
green. Thus, all vehicles wanting to make a right on red may not be able to get by the first vehicle in line. Moreover, there is only enough space for 6 to 7 cars waiting for the signal which in turn, backs up vehicles on the service road behind the aforementioned retailers. One can imagine the traffic snarl that will occur during the lunch/dinner hour when traffic will reach its peak.

Redstone is looking into the complaints and is considering adding a marked right turn at the traffic signal. The additional traffic forecasted following the opening of these retailers will also impact access to the Bloomingdale Library, the east entrance/exit onto Bloomingdale, inside the Wal-Mart parking lot and the entrance/exit onto Lithia-Pinecrest. Be extra careful when driving in that area.

BLOOMINGDALE AVENUE

The traffic signal on Bloomingdale at the north entrance/exit of Bloomingdale Square will soon be working. It will begin the flashing light phase in mid-October and be fully functioning by the end of the month. The expense is about $500,000 and is funded privately by the property owners on the north and south side of the street. The signal will use buried wires in the pavement on the Bloomingdale Square side as well as the Dunkin Donuts side to trigger the light to change, otherwise, it will stay green for Bloomingdale drivers as a priority. Be sure to notice the medians in the middle of Bloomingdale as they will prevent unauthorized cross-traffic and will provide longer stacking lanes for drivers wanting to turn south into Bloomingdale Square. The far west entrance/exit to Bloomingdale Square has been affected by a new median. It will prevent west bound Bloomingdale traffic from entering the parking lot. It will allow drivers leaving the parking lot to only turn right or east bound. This change will immediately benefit drivers with a more safe driving experience in that area.

VALRICO / DURANT ROADS INTERSECTION

This traffic signal addition is funded by the County, nearly $500,000...your tax dollars at work. It also should be in the flashing mode by mid-October and in the full function mode by the end of the month. Valrico Road is not limited to the size of trucks that can use it to cut through from Lithia-Pinecrest to Highway 60 and vice-versa. It also has regular traffic signals at Lithia-Pinecrest and Highway 60. This signal will definitely add to motorists’ safety who drive through that intersection. There is also a strong effort to have Valrico Road repaved. Both these enhancements should appeal to north-south drivers who will prefer driving on Valrico Road instead of driving on Miller Road. Hopefully, we can see a reduction in the traffic at the three streets in Buckhorn that intersect with Miller Road.

LITHIA, LUMSDEN AND DURANT INTERSECTION

The reconstruction of this heavily traveled intersection should begin in April of 2017. Roadway design, permitting and right of way acquisition is complete and the
The project is estimated to be a 34 month process and will cost in the range of $11,600,000.

The proposed improvements include the following:

**For the southbound approach on Lithia**
- The addition of a right and left turn lane and a through lane
- Raised concrete medians and separators
- A bicycle lane

**For the northbound approach on Lithia**
- Add an additional left turn lane and a through lane
- Remove the existing temporary traffic channelizer
- Replace it with a concrete traffic separator along the full length of the left turn lane
- A bicycle lane

**For the eastbound approach on Lumsden**
- Add an additional through lane and a right turn lane
- Extend the length of the existing left and right turn lanes
- Replace the existing traffic medians and traffic separators

**For the westbound approach on Lumsden**
- Add a right turn lane
- Extend the length of the existing left turn lane
- Add raised medians and traffic separators

**For Durant Road**
- Modify the connection with Lumsden by making Durant a Right-in and Right-out ONLY configuration
- No left turn provisions which allow safer and smoother traffic flow.

*A good neighbor is a priceless gift. – Chinese Proverb*
BUCKHORN COLLEGE SCHOLARSHIP CONTEST

APPLICATIONS AVAILABLE DECEMBER 1

We will have applications to Buckhorn’s annual college scholarship contest distributed to the local Hillsborough County high school’s Career Counselors on December 1. We will also have it posted on our website at BEHA@Buckhorn.Us. We will give either one or two $500 scholarships to qualified high school Seniors whose families live in Buckhorn.

The purpose of these scholarships is to promote our high school Seniors to award them for their hard work.

The purpose is also a way to make Buckhorn more attractive to families buying homes in Valrico, and as a result making your home more valuable.

Buckhorn is a subdivision of 652 homes, and the cost of each scholarship is less than one dollar per home. We appreciate your support of our Buckhorn community programs to make Buckhorn a great place to live.

Buckhorn: A great place to live and play
MAKE NOVEMBER
KNOW-YOUR-NEIGHBOR MONTH

Do you know who your neighbors are? Do you know if they are elderly and can’t get around so well? Maybe your neighbors might be someone you’d like to get to know.

Go next door and introduce yourself. If you have new neighbors, take them some cookies to welcome them. These neighborly acts will make your life fulfilled. It will make you new friends.

Buckhorn is known to be a nice place to live. Let’s continue that tradition.

LUMINARIA AVAILABLE FOR THE CHRISTMAS HOLIDAYS

Many of your Buckhorn neighbors ordered Luminary kits from the Brandon Lions Club last year. Your participation in this popular project will continue to benefit a variety of local charities including ECHO,
Brandon Outreach and the Visually Impaired Program available to the Hillsborough County Schools. The Brandon Lions Club will also be grateful for the donation of your old eyeglasses.

Traditional Christmas Eve luminaries were made the same way these are made. They are typically arranged in rows to create large and elaborate displays. The hope among Christians is that the lights will guide the spirit of the Christ child to one’s home. In recent times they are seen more as a secular decoration, akin to Christmas lights, where they are displayed during the Christmas season.

Each kit contains 15 candles, 15 plastic cups, 15 bags, and matches plus a supply of sand and is available at a very affordable $6.50 per kit. Please place your order by Monday, November 7 at the Lions’ website, www.brandonlions.org/luminary or call Joe Kuebler at his cell, (813) 263-2522. You may pick-up your luminaries on Saturday morning, December 10 at the Lions Club, 610 Limona Road, Brandon.

PROTECT YOUR BICYCLE

Bicycle thefts are a growing problem in the county and recently they have been happening in Buckhorn Preserve due to residents leaving their garage doors open in the day and night. The Sheriff’s Office established the Bicycle Theft Prevention and Registration Program.

The success of the program first involves the bicycle owner properly registering the bicycle's serial number and description with the Sheriff’s Office. Secondly, it involves the Sheriff’s Deputies checking any found or recovered bicycle with the bicycle database and if the bicycle is yours it can be returned to you immediately.

To register, contact the Sheriff’s Bloomingdale Community Station at 813-816-8040 to make an appointment. Then download the bicycle registration form by going to www.hcso.tampa.fl.us, search for Bicycle Theft Program and click on the Bicycle Registration Form. Copy the form, fill it out and take it with you to the Bloomingdale Community Station at 3622 Erindale Drive which is the next traffic signal south of the intersection of Bloomingdale and Lithia.
The information will be entered into the Sheriff’s computer system and a sticker is applied to the bicycle. If the bicycle is stolen or found, the information can be found via the name, serial number or sticker number. It is also a great idea to take a good photo or two of your bicycle and to keep it with your copy of the form and sticker number. If your bicycle is lost or stolen you will have all the information necessary to inform the responding Deputy of the particulars regarding your bicycle.

WANTED.... GOOD INFO ON CAMERA SECURITY SYSTEMS

Several Buckhorn residents have inquired of the Homeowners Association regarding their desire to get good recommendations on camera security systems that they could consider for use at their home.

Some of the questions we have been asked are as follows:

- Quality cameras that work well day and night
- Video storage capabilities
- Camera security systems that can notify their smart phone when they are tripped by an intruder
- Quality installers as well as homeowner installed systems
- Places that sell the quality camera security systems
- Price ranges for the quality equipment

We realize this can be a sensitive subject for some residents; however, you installed your choice of camera security equipment to make your home more secure. By sharing your experience with the decision you made you can greatly assist other Buckhorn homeowners and therefore improve the security of your street and the Buckhorn neighborhood. The more difficult we make it for thieves the less bold they will feel about committing crimes in our neighborhood. There is nothing as strong as a good personal reference from a very satisfied customer.

WHAT CAN YOU DO?

We would appreciate it if you would share your security camera experience with the Buckhorn Homeowners Association so that we can share the positive
information with other residents who want to protect their homes, street and ultimately the entire neighborhood. Please answer the above questions and add other pertinent information that you want to share and email it to us at beha@buckhorn.us. We understand that your security is important to you, so if you would rather, please write your information to us at Buckhorn Estates Homeowners Association, P.O. Box 1586, Valrico, Florida 33595. That way you can assist others in a manner that will not identify you or your address.

BE CURIOUS, BE SUSPICIOUS, BE VIGILENT AND SHARE YOUR OBSERVATIONS IMMEDIATELY!

Share your observations with the Sheriff at their non-emergency number, 247-8200, or 911 if you observe an emergency. Then immediately share your observation the HOA at beha@buckhorn.us.

THE SUNDOWN PROGRAM

Some people and some places refer to programs like this as the 9 p.m. program because it is a quick, easy and no cost way to improve the home security for your family. However, due to the seasonal changes when darkness occurs, we prefer to use sundown as catalyst to begin the program. As always, practice makes perfect and your youth can easily participate with this family activity because it never too early or too late to practice good, solid security measures. We call it the SUNDOWN PROGRAM.

What do you and your family do at sundown?
  
  - Make sure all the doors to each of your vehicles are locked.
  - If vehicles are left outside, be sure ALL the items of interest to others, e.g., computers, GPS systems, cell phones, briefcases, cameras, wallets, and guns are removed from the vehicle.
  - Make sure your garage door is down and that the side door to your garage is locked too. Also, consider blinds or curtains on any windows to your garage.
 ➢ If you have an alarm be sure it is on and activated. If you have an alarm and have disconnected the service provider consider re-establishing the service to maximize your protection.

 ➢ If you have a camera system, make sure it is working at peak performance and that all areas of your home are covered. Pictures assist the property crimes detectives in apprehending thieves quickly and the evidence makes the case much stronger in court.

 ➢ Check each window and door to ascertain that they are properly closed and locked.

 ➢ Close your blinds and curtains so others cannot observe who and how many persons are home.

 When we each work on our individual security measures, then collectively, your entire Buckhorn neighborhood is a harder target for any thieves to try to overcome and not get caught.

 HOW TO CREATE A GREAT PASSWORD

Most of us have done it before; created computer passwords that are very easy for others to guess or to break, especially when anyone can use public information to learn your complete name, birthdate, address, children’s’ and pet names, etc. The word “password” or “1234567890” or your name or your name spelled backward are examples of easy to break passwords that secure your valuable information.

It is getting more and more important to secure your valuable data with passwords that make sense to you but are very difficult for others to break into. Most of us have slowly made the conscious decision to migrate more and more of our information to computer related sources to make life easier.

A good example of a simple password is to develop one that makes sense to you and that is also easy for you to remember. Generally a phrase that is shortened to use as a password is very effective. An example is “I would like to visit each of the seven
continents by the end of the decade.” You can shorten it by using only the first letter of each word, “Iwltveotscbteotd”. It can be enhanced or used on different accounts by adding a special character or two to the beginning or end or both to the original password that you have chosen. Examples of characters to use can be “@”, “#”, “$”, “+”, “<”, or various digits, 1,4,7,88, etc.

Hopefully, each of us can change our passwords to make them more difficult to break. None of us want to have to spend untold dozens of hours to clean up the mess a computer based thief can do to our accounts. Some losses may be protected if they are reported to the financial institution with a specified amount of time, 90 days for example. However, some companies may not protect you at all, the losses are your problem. Please do not be a victim…PROTECT YOURSELF FROM CYBER THIEVES!

TO SHRED OR NOT TO SHRED
THAT IS THE QUESTION

Your Buckhorn Homeowners Association sponsored our neighborhood’s first shredding and electronics recycling event in the spring of last year. The turnout for the shredding was moderate with a wide variety of positive comments by those residents who took advantage of the opportunity.

The electronics recycling event garnered a good response. Again residents were very appreciative of the HOA sponsoring these two events.

WHAT YOU NEED TO DO!

We need your valuable feedback as to whether you and your family will use and support another paper shredding and electronics recycling event in the spring of 2017. It takes HOA volunteers time and money to arrange the event, therefore, we want to be sure that you want us to do it again and you will bring your old paper records and old electronic devices to the event to support it.

Email us at beha@buckhorn.us with your thoughts; yes or no to sponsor the event.
FALL IS CLEAN-UP FIX-UP TIME

Fall/winter means cooler temps and lower humidity. It is a great time to prepare your property for the season. Mowing, edging and trimming of your plants and hedges will slowly decrease in frequency. It is a good time to invest in more long term projects to make your property (it makes no difference if you are a home owner or a renter) and the neighborhood look its best.

Some ideas to consider are:

- Pressure washing your home, drive & walk ways and fences to remove mildew and dirt
- Painting your home
- Rescreening your lanai and pool area
- Cleaning/ replacing your roof
- Cleaning your fireplace for a warm and safe season
- Having your air conditioning/ heating system checked
- Fertilizing your yard to make it through the dormant months
- Major trimming of your trees in the winter when the sap is down
- Remember to keep up with your mulching to retain moisture
- Look for insect nests and damage and treat immediately
- Remove unsightly items that may be stored on the side of your home like building materials, containers, plastic bags, old bikes/toys, propane tanks, etc.

It is important that each of us invests in our property to keep Buckhorn an attractive, comfortable and safe place to live. Our property values will be as strong as our neighborhood is as a whole.
PROPER CARE AND MAINTENANCE OF OAK TREES

The high winds that our neighborhood recently experienced from a passing hurricane pointed out the necessity that each Buckhorn homeowner/renter needs to know more about the care of their mature oak trees. The trees are particularly sensitive to anything that occurs within their root zone and under their canopy. Buckhorn had three trees that fell across streets blocking traffic. One falling tree crushed a concrete TECO streetlight pole. Another falling tree poke a hole in a roof while another tree fell on a minivan parked in the driveway destroying it. The Buckhorn Golf Course had several trees fall, several large branches break off and the tops twisted out of several blooming trees.

WATERING – Oak trees are very sensitive to over watering. There is no need to allow sprinklers to hit the tree with water. If you have plants under the tree try to only water the plants and do not overwater the tree.

FERTILIZING – Only provide a light application of a slow-release organic fertilizer and do it once a year in late winter. Water only enough to dilute the fertilizer. Too much or too frequent fertilizing can cause the death of an oak.

PRUNING – Care should be taken when pruning limbs. Extra long and drooping limbs need to be trimmed. In addition, a reasonable amount of limbs in the center part of the tree need to be removed to allow storm winds to more easily flow through the tree. The best time to trim the tree is in the winter dormant time for deciduous species. The best time for evergreen species is in July and August. The Florida weather keeps the trees growing nearly year round and proper shaping and trimming can be done by qualified tree trimmers year round.

DISEASES AND PESTS - Keep an eye out for unusual changes in the appearance of the bark and the leaves of your tree. Cracked bark or bark that is falling off the tree indicates stresses or insects are attacking your tree. Small holes in the bark or sawdust around the holes or base of the tree are additional indicators of insects. Missing or areas of thinning leaves on the branches are indicators of poor tree health. This condition can allow air moss or mistletoe to grow and the tree will
become sicker. Eventually, it will become a victim of winds or will simply begin to fall apart.

PROBLEM SIGNS – Additional signs that your oak may be experiencing problems include:

- Failure to produce a reasonable amount of new leaves
- General wilting
- Parasites including mistletoe
- Open wounds that show deteriorated internal wood
- Large masses of brown leaves in the tree crown
- Oozing sap yellowed, discolored or streaked leaves or bark
- Broken branches with the upper tips bare and dying back

If any of these symptoms are present you may want to contact an experienced tree trimmer or an arborist. Hillsborough.ifas.ufl.edu/urbanforestry/arborist is a good start. Our neighborhood is fortunate to have a well trained and experienced tree trimming expert, Mr. Lynn Olcott of Advanced Tree Service living in Buckhorn. He can be reached at 813-655-4747. He has a registered arborist on his staff who provides expert advice as needed.

In any event it is up to you to provide preventative care to your trees so that they will not damage your or your neighbor’s property, moreover, injure or kill an individual because they were allowed to deteriorate to a very poor condition.

GOOD BYE TO YOUR OLD PLAQUES & TROPHIES AND HELLO TO A NEW AND PRODUCTIVE USE FOR THEM

Your Buckhorn Homeowners Association has found a terrific way for you to RECYCLE the old plaques and trophies that you and your children have accumulated over the years.

The Hillsborough County Fair Authority has an arrangement with a local plaque and trophy provider that will allow the Hillsborough County Fair folks to take your donated plaques and trophies and reuse them. This dramatically lowers the cost to
provide the 600 to 700 plaques and trophies each year awarded to our county youth who participate in the many and varied contests that are staples of the Hillsborough County Fair.

An example would be for the trophy company to remove the victory person from the top of a trophy as well as the name plate and replace it with a farm animal or agricultural product on the top and a new plate with the youth’s name and event on it. Another example would be for the trophy company to remove the plate on a wood, plastic or marble plaque and replace it with a new plate containing the youth’s name and event on it representing achievement in the Family Living (arts & crafts) category. Some Buckhorn residents who hate to throw items like these away have donated several copy paper boxes of old plaques and trophies to the Fair Authority recently. Hopefully, you can do the same.

The Hillsborough County Fair Authority is located at 201 Sydney Washer Road in Dover. It is approximately 200 feet north from the intersection of Sydney Washer Road and Highway 60 which is east on Highway 60 from Brandon/Valrico. You can reach Suzanne at the Fair Authority via 813-737-3247 or via email at suzanne@hillsboroughcountyfair.com to make any arrangements regarding your old plaques and trophies. This time of year their office hours are Monday, Wednesday and Friday from 9 a.m. to 1 p.m. In the fall of the year their hours will be longer.

THE HEMLICH MANEUVER
KNOW IT NOW FOR THE UNEXPECTED FUTURE

In 1974, a surgeon named Dr. Henry Heimlich invented the lifesaving maneuver for choking victims which was named after him. It is interesting to note that recently at the age of 96; Dr. Heimlich was in Cincinnati, Ohio when an 87 year old woman near him began exhibiting signs of choking on her dinner. The Dr. sprang into action, performed the maneuver, and quickly dislodged a piece of meat with some
bone in it that had clogged the woman’s airway. He saved her life. Nearly 3,000 people die each year in America because they inhale rather than swallow their food. Choking on food or any other small foreign object can strike anyone of any age at any time in any place. It will be beneficial to you and your family to know how to quickly assess the situation and to correctly perform the Heimlich maneuver.

WHAT DO YOU DO?

- Assess the situation, the person cannot speak or cry out, begins to turn blue for the lack of oxygen, they grab at their throat or the person has a weak cough and labored breathing that may produce a high pitched noise. If others are there, request they call 911 for medical help while you perform the maneuver.
- Stand behind the victim if possible and tilt the forward slightly.
- Make a fist with one hand and place it with the bent thumb under the rib cage and above the navel.
- Clasp your other hand over your fist.
- In a series of 6 – 10 sharp and distinctive thrusts upward and inward try to develop enough force to expel the foreign object.
- If the first series of the maneuver is not successful try again immediately.
- If the victim is unconscious, lay them on the ground, look to see if you can remove the foreign object from the mouth/throat and repeat the procedure while the victim is prone.
- If the object is expelled but the victim is not breathing then immediately perform CPR.
- If the victim is pregnant, place the heel of your hands on the breastbone and follow the same procedure.
- If the victim is a child over 1 year of age, use the regular procedure but with less force in an effort to not damage any internal organs.
- If the child is less than 1 year old, the rescuer sits down and lays the child along his forearm with the infant’s face toward the ground. Support the infant’s head with your hand while you use your free hand to deliver 4 or 5 rapid blows to the infant’s back between the shoulder blades.

Only perform the Heimlich maneuver when the airway is COMPLETELY BLOCKED. If the victim can still breathe a little on their own, try to keep them calm and encourage them to cough as hard as possible in conjunction with well-timed back slaps by you if required. Medical assistance should still be obtained via 911 as soon as the event occurs.
THE OLD ALBERTSONS LOCATION

The developer says that they are planning a complete renovation of the exterior of the property. In addition, they plan to request building permits by November to subdivide the buildings into three new sections. Each of these locations will accommodate a separate new business to our neighborhood. We will provide additional new information to each of our homeowners or renters who have provided their email address to the Buckhorn HOA at www.Buckhorn.Us. We were told a few months ago that one of those tenants would be Sprouts Farmers Market. Sprouts have announced they are opening a market in Carrollwood in early 2017. They are also planning to open a market in south Tampa and Valrico.

YES, WE GET COMPLAINTS

The following are some things the HOA gets complaints about on a regular basis.

ARE YOU OR OTHER MEMBERS OF YOUR FAMILY THE ONE THEY ARE TALKING ABOUT?

- Recyclables and household garbage MUST go into the proper containers. NO excess cardboard, e.g., moving boxes, TV boxes, shipping boxes, etc., are allowed beside the containers. Drivers will not get out of the truck to hand load these extra items. Cut the cardboard boxes into smaller pieces and put them into the recycle container.
At Buckhorn Park and when walking through the neighborhood you MUST keep your dog on a leash per Hillsborough County ordinance. Your dog may be friendly but another dog may not be. Moreover, an unleashed excited dog may chase and bite small children or adults who then become innocent victims of the unleashed dog.

In the neighborhood and at Buckhorn Park it is also a Hillsborough County ordinance requiring you to pick up your dog’s feces and properly dispose of it in a garbage container. Dogs can easily spread worms and viruses via their feces, not to mention that others can step into your dog’s feces and they have to deal with the clean-up.

The speed limit is 25 MPH in the neighborhood all day and all night. Some residents have a habit of exceeding the speed limit on a regular basis. If this could be you exceeding the speed limit, double check yourself by glancing at your speedometer once in every block you drive through the neighborhood. Speeding regularly can become a habit and old habits are hard to break only because the speed you drive in the neighborhood FEELS normal to you. Remember, LEAVE ON TIME TO ARRIVE ON TIME!

Are you one of the Buckhorn residents who regularly leave your vehicles UNLOCKED IN THE DRIVEWAY? Are you in the habit of leaving your garage door OPEN for hours at a time during the day or overnight? Thieves are cruising neighborhood streets looking for you because you are the EASY TARGET...low hanging fruit. But the sad thing is that you are also telling thieves that Buckhorn is a good hunting ground and they will want to cruise through on a regular basis. This puts your neighbors and friends at risk in addition to yourself. Make Buckhorn a HARD TARGET so that thieves will pass through and keep going without anything to show for their effort. LOCK YOUR VEHICLES AND CLOSE YOUR GARAGE DOOR!
HOA EMAIL ALERTS PROTECT YOU & YOUR FAMILY

- Do you want to know if there has been criminal or suspicious activity in our community?
- Do you want to know about nearby community actions that will affect traffic?
- Do you want to be reminded about our events such as our Community garage Sale?
- Are you interested in back-to-school safety tips?
- Is your pet lost and you want a way to get over 600 homes to be on the lookout for it?

If we have your e-mail address we can get these types of valuable information to you.

- We use the Constant Contact e-mail system that protects your address.
- You can opt-out at any time.

TO REGISTER:

- Just go to our Buckhorn Website at www.Buckhorn.Us
- Click on the GREEN Subscribe button and provide your information.

Our E-Mail System is for homeowners and renters. There are no costs to be part of it.
